

Remarks

Applicant thanks Examiner Duong for the careful examination of this application and the clear explanation of the claim rejections and objections; and for allowing claim 20 and conditionally allowing claims 2-4, and 8-11. In response to the Office Action of May 12, 2006, applicant amends the specification as follows:

1. claim 5 is amended to delete the word "particular";
2. claim 10 is amended to add "each other" to correctly describe the invention;
3. claim 20 is amended to delete the phrase "including the particular mold block," to correctly describe the invention.
4. claim 1 is amended to incorporate all claim limitations in claim 2, which Examiner Duong allowed conditionally;
5. claim 2 is canceled;
6. claims 3-12 properly depend from now patentable claim 1 and stand patentable.

Applicant respectfully submits that, as amended, this application is in allowable form and all pending claims distinguish over the cited reference and stand patentable. Applicant respectfully requests further examination of this application and timely allowance of all pending claims.

Respectfully submitted,

Texas Instruments Incorporated
